

Università degli Studi di Milano - Bicocca
**Dottorato di Ricerca in Scienze Chimiche,
Geologiche e Ambientali**
Curriculum in Scienze Chimiche

SEMINARI DI FINE ANNO – XXXVII CICLO

Mercoledì 21 settembre 2022, dalle ore 09:30

Aula U9-12

Anita Zucchi

Green synthesis of a library of probes for retinal photosensitization and bioimaging

Simona Petroni

Polysaccharides derived from biomasses for the development of innovative materials

Amedeo Manuel Cefali

Systems and technologies for the implementation of Proficiency Tests applied to gaseous micropollutants

Pietro Maroni

Study of the removal of environmental CO₂ by optimizing the microwave-assisted mineral carbonation process of antigorite quarry waste

Alessandro Bonardi

Computational study on light emission by Nanoluc luciferase

Emmanuel Cruz Munoz

Geochemical study of sulfide minerals persistence in the sedimentary records

Tommaso Caielli

Poly (aryl-piperidinium) alkali stable Anion Exchange Membranes; Synthesis and characterization
