**Dottorato di Ricerca in Scienze Chimiche,
Geologiche e Ambientali**
Curriculum in Scienze Chimiche

SEMINARI DI FINE TRIENNIO – XXXV CICLO

Lunedì 19 settembre 2022, dalle ore 09:30
Aula U1-03

Gabriele Brunetti

Preparation and characterization of electrode materials for alkaline secondary batteries

Cadamuro Francesca

Generation of functionalised biomaterial for biomedical applications

Marco Nicola Iannone

Development of new “general purpose” methods in order to introduce Fluorine-18 radionuclide in biologically active macromolecules.

Alessandro Mancini

Physico-chemical characterization of emissions from braking operations

Alessio Romerio

New small molecules as toll-Like receptor 4 (TLR4) modulators: synthesis and biological characterization
