

DISCUSSIONE TESI XXXI CICLO

Martedì 19 febbraio 2019
Aula Marchetti (edificio U1, piano terra)

----- **Ore 9:00** -----

Florent Cochet

“Design, synthesis and bioconjugation of TLR4 ligands to understand and modulate innate immunity processes”

Roberto Guizzardi

“Design and synthesis of nanostructured biomaterials for regenerative medicine”

Daniele Piga

“From high-pressure to in-situ polymerization: design and synthesis, new challenging of porous materials”

----- **Ore 13:30** -----

Alessandro Sanzone

“Towards the development of sustainable materials for organic electronics”

Rany Rotem

“Development of reliable experimental models for the study of the biological behavior of drug nanocarriers”
