

PhD PROGRAM in CHEMICAL, GEOLOGICAL, AND ENVIRONMENTAL SCIENCES
FINAL DISSERTATION – XXXVI CYCLE
ENVIRONMENT CURRICULUM

Friday, January 24th - 9.30

Room U3-08

FRANCESCA FORMICOLA

"New biomolecular strategies for the monitoring of biodegradation processes and for the remediation of contaminated sites"

CLARISSA BARBARA RAGUSO

"Microplastics and their associated contaminants in the marine environment: from detection to the mechanisms of interaction with marine biota"

LARA QUAGLINI

"The role of biotic interactions and abiotic factors in the invasion process of invasive alien plants"

ANDREA MASSERONI

"The environmental impact of nanoplastics: evaluation of their effects on different aquatic species and first insights into their occurrence in wild organisms"
